FULL-STACK SOFTWARE ENGINEER

Innovative & Security-Focused Software Engineer | .NET Core | Laravel | Azure Cloud | API Development

PROFESSIONAL SUMMARY

Experienced Full-Stack Developer with 4+ years of expertise in server-side development (C#, Laravel, ASP.NET Core, Django, Python, Satellite Imagery, Weather Data), front-end technologies (CSS, JavaScript, ReactJS), and cloud deployment (Azure, Contabo VPS, ArgoCD). Good at building scalable web applications, RESTful & GraphQL APIs, and implementing robust security measures (Sophos Firewall, VLANs). Passionate about Agile methodologies and automated CI/CD pipelines.

TECHNICAL SKILLS

- Backend Development: C# & .NET Core, PHP & Laravel, GraphQL API Development, Python, Worker services, CQRS
- Frontend Development: Reactjs, JavaScript, UX/UI Design principles
- DevOps & Cloud: Azure and Contabo Cloud Deployment, CI/CD Automation, Firewall & Network Security
- Methodologies & Tools: Agile (Scrum/Kanban), Git & GitHub, Postman, Docker, WSL, ArgoCD, Satellite Data

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Earthasoft Technologies | August 2026 –Current

- Developed a satellite data-driven land intelligence application featuring soil and water mapping, field-level weather forecasting, and crop monitoring.
- Built a GIS prototype for field boundary delineation and a chatbot tool-calling runtime to support core application features.
- Deployed and managed deployment pipelines up to cloud VPS

Software Developer

Reformed Church University, Masvingo, Zimbabwe | Apr 2023 – July 2026

- Developed Laravel-based ERP system, Student Portal, and Online Application System, enhancing efficiency and Integrated a number of external APIs into the mentioned systems
- Engineered dynamic front-end interfaces (HTML, CSS, JS , Laravel framework) for seamless user interaction.
- Configured Sophos Firewall & VLANs using SSL, improving network security.

Backend Software Developer

Property 365 Solutions, Johannesburg, South Africa | Jul 2021 – Jun 2022

- Built ASP.NET Core RESTful & GraphQL APIs, improving data retrieval speed.
- Developed Azure-hosted worker services (Service Bus, Azure Queues), ensuring reliable asynchronous processing.
- Automated deployments using Azure Pipelines (Kubernetes, App Services), reducing manual errors.

EDUCATION

Bachelor's Degree in Computer Science (Class 2.1)

Great Zimbabwe University, Masvingo | Completed: 2019

- Vice Chancellor's Award (Top-Performing Student)

CERTIFICATIONS

- **Foundations of User Experience (UX) Design – Google (Apr 2022)**

KEY ACHIEVEMENTS

- Deployed 6+ scalable web APIs on Azure Cloud with zero downtime.
- Enhanced security by implementing Sophos Firewall & VLANs for enterprise systems.
- Optimized API performance by using GraphQL & RESTful best practices.
